

2001 CATERHAM SUPER 7

The Lotus Seven began as an updated version of the successful Lotus Mark 6. Steel tube frame with aluminum bodywork, later with glass-fiber nose and fenders. A variety of engines were used. Low, light, very quick, incredible handling and a winner of enumerable club races. Lotus discontinued production after the introduction of the Glass-Fiber steel backbone framed Series 4. Licensed replicas are still in production today.
